

Comments by teachers involved in the project

The project was well organized and it was very interesting to have the opportunity to exchange ideas and proposals as well as teaching techniques with the colleagues from other European countries. Thank you

This project was a great opportunity for us and our students to improve our knowledge about partners' cultures. Thank you and all partners I think we were very lucky as we were in this project. Hope to meet you all in another project. Love from Turkey.

Thanks to the project, we, as teachers, had a great experience during two years. So did our students. They really enjoyed every moment of it. Our students say that they will never forget it. We are really happy to have been involved in the project.

I think the project made it possible for our students to acquire knowledge about different cultures and get to know other countries' customs, traditions, teaching methods.

I've learnt a lot during these two years, and I'm happy that I've got to experience so much. I'd gladly participate in other projects.

It was a unique experience! - hard work but worth every effort.

I had a chance to know other cultures. I'm really happy to meet the teachers and the students from different parts of Europe.

I was impressed by the project, by the ways of total involvement both of students and teachers. We all learn more about each others, school systems, culture. I am honored that I participate in this project.

I like this project very much.

It was a great Comenius Project.
